

SET UP YOUR INCIDENT TICKETING SYSTEM B2B INTERFACE WITH VERIZON

Service Management eBonding

Service Management eBonding refers to a B2B software interface which automates the data exchange between two business applications. Changes in transactional data in one system are reflected in the other system essentially electronically "bonding" (eBonding) the two sets of data. The benefits of Service Management eBonding include increased efficiency, fewer communication errors and shorter repair times.

What does Verizon offer?

Verizon empowers customers with the ability to set up a personalized Service Management interface. With resources such as technical assistance provided by Verizon, the portal greatly simplifies Service Management eBonding for users who are new to the process. The implementation timeline from registering to the portal until production can be as short as 6 weeks.

Service Management eBonding is available for the following business processes:

- Incident Management
- Inventory Management
- Change Management

Verizon recommends Incident Management eBonding for customers that have more than 30 incident tickets per month.
