Virtual Contact Center - VCC		Onboarding Package- Complex 50+ Seats		\$26,816.40	Flat	24 Month
Virtual Contact Center - VCC		Onboarding Per User		\$14.90	Per Unit	24 Month
Onboarding Package. Virtual Contact Center (VCC) implementation team (EM (Engagement Manager) & CS (Configuration Specialist) uses audio and web-based tools for end-to-end project management. Projects begin with a review of the process and proceeds to requirements gathering to determine the criteria and business rules needed to successfully configure the customer's contact center. Once the scope of the project is agreed upon we work closely with the customer's designated administrator(s) to configure the call flow, providing training throughout the process. A 3-step testing process (Verizon/customer) follows to ensure the configuration is working as scoped. Online training resources are available for on-demand review and train-the-trainer training is provided for the customer's designated trainer(s). On the agreed upon go-live date, the implementation engagement manager coordinates cutover activities and validates call delivery to VCC agents. A monitoring period follows the cutover where the Implementation engagement manager remains engaged to address any post-cutover issues that may arise. There are 3 levels of Implementation, Easy(E), Moderate(M), and Complex(C), all of which include the following but at different quantities: - Remote Implementation Services Only - Included # of Users (E< 15 Users, M<=50, C>=50 users) - 1 contact center work group or multiple work groups utilizing same call flow - Contact Types - Voice, Chat, E-mail (E-1, M- choose 2, C-all 3) - Menu/Submenu options (E-5, M-10, C-25) - Points of Contact (E-25, M-50, C-100) - English language only - Voice Recording (caller to agent) - Hands On VCC Admin training - 1 Agent & 1 Supervsior Train the Trainer session (up to 6 participants) - Train the Trainer Agent & Supervisor Guides provided to the customer - Review of customer accepted Studio Scripts - 1 Cutover - Post install support, # of business days (E-2 day, M-5 days, C-10 days)

Unique User Includes:
- The Unique Logged in Agent measures the number of agents (or supervisors) who login to the ACD / Dialer platform at any point, for any duration, during the billing interval.
- 1 ACD Agent
- 1 Campaign Dialer Agent (For a selected station, the agent can operate either as an ACD agent or as a dialer agent at any given time. Initial availability of campaign dialing functionality requires a Dialer Implementation.)
- 1 Universal Port - Used for IVR and voice, but does not affect chat or email
- 1 GB Data Storage and Management for storage of recordings, prompts, scripts, messages, files, and more.
- Includes access to call monitoring and call conferencing
- Accounts support FTP or SFTP delivery of call recordings
- Supervisor reporting
- B7 ACD / IVR programming toolset (i.e., inContact Studio)

Concurrent User Includes:
The Concurrent Agent license measures the number of agents simultaneously logged into the ACD platform during the billing interval.
- 1 ACD Agent (enabled for voice only transactions)
- 1 Universal Port - Used for IVR and voice
- Includes access to call monitoring and call conferencing
- Accounts support FTP or SFTP delivery of call recordings
- Supervisor reporting
- ACD / IVR programming toolset (i.e., inContact Studio)
- Agent Scripting

VCC NRC Description

**PRICING WITH DIR ADMINISTRATIVE FEE
(CUSTOMER PAYS THIS AMOUNT)**

Geographical Area: Texas	
OnBoarding Package	<p>Onboarding Package.</p> <p>Virtual Contact Center (VCC) implementation team (EM (Engagement Manager) & CS (Configuration Specialist) uses audio and web-based tools for end-to-end project management. Projects begin with a review of the process and proceeds to requirements gathering to determine the criteria and business rules needed to successfully configure the customer's contact center. Once the scope of the project is agreed upon we work closely with the customer's designated administrator(s) to configure the call flow, providing training throughout the process. A 3-step testing process (Verizon/customer) follows to ensure the configuration is working as scoped. Online training resources are available for on-demand review and train-the-trainer training is provided for the customer's designated trainer(s). On the agreed upon go-live date, the implementation engagement manager coordinates cutover activities and validates call delivery to VCC agents. A monitoring period follows the cutover where the Implementation engagement manager remains engaged to address any post-cutover issues that may arise.</p> <p>There are 3 levels of Implementation, Easy(E), Moderate(M), and Complex(C), all of which include the following but at different quantities:</p> <ul style="list-style-type: none">- Remote Implementation Services Only- Included # of Users (E< 15 Users, M<=50, C>=50 users)- 1 contact center work group or multiple work groups utilizing same call flow- Contact Types - Voice, Chat, E-mail (E-1, M- choose 2, C-all 3)- Menu/Submenu options (E-5, M-10, C-25)- Points of Contact (E-25, M-50, C-100)- English language only- Voice Recording (caller to agent)- Hands On VCC Admin training- 1 Agent & 1 Supervsior Train the Trainer session (up to 6 participants)- Train the Trainer Agent & Supervisor Guides provided to the customer- Review of customer accepted Studio Scripts- 1 Cutover- Post install support, # of business days (E-2 day, M-5 days, C-10 days)
OnBoarding Per User	Onboarding Per User. In addition to the base Onboarding Package to deploy Virtual Contact Center, the Per User charge covers the implementation and configuration of the ordered Users.
Email/Chat Implementation	<p>Email/Chat Implementation. Implementation Package to configure and implement Email and/or Chat functionality within VCC platform is Billed as a one time (non-recurring) charge and includes:</p> <p>~ Includes one email or chat script to support one email chat skill</p> <p>~ Email scripts/skills includes:</p> <ul style="list-style-type: none">- Automated email received response- inContact dot-com email addresses provided to customer to be embedded into their existing website- Integration to a custom database or CRM not included <p>~ Chat scripts/skills include:</p> <ul style="list-style-type: none">- Up to 20 questions and responses- URL provided to customer to be embedded into their existing website- Integration to a custom database or CRM not included <p>If you select Email only or Chat only the associated description above for that contact type would be provided</p>

Digital CX

Knowledge Assist

Delivered as SaaS, cloud-hosted solution, this knowledge management solution enables agents quick access to an organization's knowledge and data sources through a single interface as they are assisting customers. Knowledge Assist uses Artificial Intelligence to compile responses to agent inquiries from system integrations, web-crawling (reading) of internal and external websites, and authored content. Agents can ask questions of Knowledge Assist using natural language without having to memorize specific search terms. Reporting provides administrators with insights on what agents are searching for and alerts them of gaps in the knowledge content.

Product	MRC	MRC Description	Implementa tion	NRC	NRC Description	Charge Type
Digital CX		Knowledge Assist - Implementation	Knowledge Assist	\$77,380.16	Knowledge Assist - Implementation	NRC
Digital CX	\$184.15	Knowledge Assist - 1- 250 Agents				MRC
Digital CX	\$176.83	Knowledge Assist 251-500 agents				MRC

Live Agent
Delivered as SaaS, cloud-hosted solution, this live chat solution enables agents to connect directly to customers over digital channels including webchat, social messaging applications, mobile applications, and Short Message Service (SMS). Live agent supports textual chat communication, as well as voice and video over web real-time communications (Web RTC). It can optionally be paired with the Virtual Agent feature to serve as an escalation to a human agents to take over the interaction, while passing over full context of the Virtual Agent interaction to the human agent.

Product	MRC	MRC Description	Implementa tion	NRC	NRC Description	Charge Type

Social Intelligence, Social Command Center, and Social Outbound Campaigns
Social Intelligence provides a listening and engagement module to bring together public consumer social media posts of interest, as defined by the organization across social media channels into a single dashboard. Using natural language processing, it provides sentiment tracking, identifies important influencers, associates, and trending alerts to the forefront so digital teams can route and manage large social volumes to appropriate team members and engage constituents appropriately. Social Intelligence is required when ordering from Social product suite, while Social Command Center and Social Outbound Campaigns are optional add-ons.
