**Description of the Planned Network Change(s):**

The Verizon Damascus MD 5E switch, located at 9944 Lewis Drive, Damascus, MD 20872, will be retired and removed from the Verizon network after all traffic served by this switch is migrated to the Gaithersburg MD CS2K switch, located at 5 N. Frederick Avenue, Gaithersburg, MD 20877. All traffic to be migrated to the Gaithersburg MD CS2K switch includes, but is not limited to, Inter-LATA (ACCESS/FG-B-D/CLEC IXC), wireless and paging traffic.

**Description of Reasonably Foreseeable Impact(s) of the Planned Change(s):**

All carriers, including competitive local exchange carriers (CLECs), interexchange carriers (IXCs, IECs), wireless carriers, and paging carriers will need to provision new trunk groups to support direct end office trunking to the Gaithersburg MD CS2K switch or have existing trunk groups to that switch augmented.

All ASRs for the Gaithersburg MD CS2K switch must be received no later than **September 20, 2023** to provide sufficient time to migrate the traffic described above. Local Exchange Routing Guide (LERG) change effective dates will be posted prior to decommissioning of the Damascus MD 5E switch (**on or after November 1, 2023**). This will serve to guide interconnect re-routes of traffic for the NPA codes currently served by the Damascus MD 5E switch to reflect the Gaithersburg MD CS2K switch as the new home switch. All trunks to the Gaithersburg MD CS2K switch must be in place prior to the decommissioning of the Damascus MD 5E switch. All ASRs for the Gaithersburg MD CS2K switch must carry a project code of **DMSCMDDERP0**.
