

Verizon Partner Solutions

Dark Fiber for Infrastructure

Scalable, Flexible, and Reliable

Verizon's dedicated fiber optic strands support advanced network solutions and future-proof connections in select markets.

Key features include:

Scalable: With customer control of transmission protocols and encryption.

Flexible: With term lengths and pricing approaches.

Reliable: Delivered on the robust, multi-billion dollar Verizon network.

Service Delivery: At FDPs or optical termination modules. Service activated with a **KMZ**, as-built engineering details, and **test results**.

Enabling Artificial Intelligence (AI) Infrastructure Requirements

Collaborating on near-net solutions
Connecting at data centers, landing stations, carrier hotels, and/or handholes

Diversity | Resiliency | Replication
Available in **90+** major U.S. metro markets
in **38 states**

Why Verizon?

We're a **trusted partner** to the world's largest companies. Nearly all of Fortune 1000 uses Verizon technology and services. We're a communications service provider with **scale that few can match**.
